Features and specifications are subject to change at any time without notice. Visit [wolfappliance.com/specs](http://wolfappliance.com/specs) for the most up-to-date information.

**E Series Ovens.** The newest addition to the Wolf built-in oven family is a true partner, helping to create great meals with ease, as well as adding a striking design feature to the kitchen. Smart technology gives the E series 10 cooking modes, with Wolf's innovative dual convection in single ovens and in the upper unit of double ovens. E series ovens can be installed flush with cabinets for a contemporary, integrated look. New black glass models with tubular handles are also available.

## KEY FEATURES

- Dual convection: two fans for even heat distribution.
- Ten cooking modes, including the bake stone and dehydration kits for precise, easy-to-use control.
- Self-cleaning ovens.
- Full-extension bottom rack for easier access to foods.
- Balanced door hinge system for smooth opening and closing of the door.

# E Series Ovens

## 762 mm SINGLE OVENS

## 762 mm DOUBLE OVENS

Interior Specifications			
INTERIOR CAPACITY			L
762 mm Oven			127
INTERIOR DIMENSIONS	W	H	D
762 mm Oven	635 mm	419 mm	483 mm

Planning Information

STANDARD INSTALLATION

For ease of installation, Wolf recommends using 838 mm wide cabinets with 762 mm ovens. You will need a minimum 610 mm of usable cabinet depth. The cabinet must be able to support 113 kg for a single oven and 181 kg for a double oven.

The oven has a face trim on all four sides and will overlap stiles and rails. Refer to the chart for overlap dimensions.

Oven Trim Overlap	
OVEN TRIM	E SERIES
Top Overlap	16 mm
Bottom Overlap	3 mm
Side Overlap	19 mm

FLUSH INSET INSTALLATION

A flush inset installation requires the oven to be recessed into the cabinet. A minimum 635 mm deep cabinet is needed if you want the front of the oven to be flush with surrounding cabinetry.

Electrical Requirements

**IMPORTANT NOTE:** Be aware of local codes and ordinances when installing your service.

The single and double ovens require a separate, grounded 220-240 V AC, 50/60 Hz power supply and uses the power inlet box. Refer to the illustration below. Total amps for single ovens is 21 and for double ovens, 37.

E SERIES SINGLE OVENS

**Required power supply:**  
Single phase: 220-240V AC; 50/60 Hz  
3phase: 380-415V AC; 50/60 Hz

**Maximum connected load:**  
Single phase: 4.4 kW  
3phase: 4.4 kW

**Total amps:**  
Single phase: 19 amps  
3phase: 19 amps

E SERIES DOUBLE OVENS

**Required power supply:**  
Single phase: 220-240V AC; 50/60 Hz  
3phase: 380-415V AC; 50/60 Hz

**Maximum connected load:**  
Single phase: 7.4 kW  
3phase: 5.1 kW

**Total amps:**  
Single phase: 32 amps  
3phase: 22 amps

Refer to the wiring diagram showing the connections for each lead to the terminal box on the unit.

Single phase wiring diagram.

3phase wiring diagram.

## 762 mm E Series Double Oven

### FLUSH INSET INSTALLATION

\*For black glass model, increase dimension by 6 mm.

NOTE: Platform must support 181 kg.

Location of electrical supply within opening may require additional cabinet depth.

Dashed line represents profile of unit.

**Microwave Ovens.** Taking the experience we've gained from our microwave ovens and combining that with the expertise of convection, Wolf has brought the best of both cooking technologies together in one unit. Aside from looking beautiful whether you use it in conjunction with an oven or not, the unit offers you all the performance you expect from Wolf—a cooking company with a heritage of nearly 75 years in the kitchen.

#### KEY FEATURES

- Built-in convection microwave oven with 40 L capacity
- 230 V model output power—microwave 900W, grill 1300W and convection 1450W
- 240 V model output power—microwave 900W, grill 1400W and convection 1400W
- 762 mm trim allows microwave to be built in to fit above a Wolf built-in oven
- Classic stainless steel trim
- 5 auto-cook settings
- Multiple language settings
- Energy save mode
- 10 convection temperature settings
- 5 cook settings
- Removable 362 mm turntable and turntable support
- Removable low rack for broiling and removable high rack for baking
- Oven door with window
- Multiple rack baking
- Safety door latches—oven will not operate unless the door is closed
- Oven light comes on when oven is operating or door is open
- Tight door seals
- Rear ventilation openings

#### CONVECTION MICROWAVE WITH GRILL

ICBMW30-230

ICBMW30-240

Planning Information

Specifications on the following page provide overall dimensions, rough openings and installation options for the convection microwave oven. We have minimized the information contained in the illustrations, concentrating on the critical information you need to plan your installation.

ELECTRICAL REQUIREMENTS

Connect the appliance to a single phase 230-240 V/50 Hz alternating current via a correctly installed earth socket. The socket must be fused with a 16 A fuse.

**Warming Drawers.** Wolf warming drawers are designed to take care of prepared foods until it's time to serve them. You can adjust the temperature, keeping moist foods moist and crisp foods crisp. Warming drawers are ideal for proofing dough. Stainless steel drawer fronts are available to match the look of Wolf E series built-in ovens and sealed burner rangetops. The integrated drawer front allows for a custom wood panel and handle. Model ICBWWD30, approved for outdoor installations, is ideal for any outdoor kitchen.

KEY FEATURES

- 850-watt heating element with temperature control range of 26°C to 93°C.
- Spacious 43.5 L interior capacity.
- Preset, four-hour automatic shutoff.
- Hidden electronic touch controls for sleek appearance.
- Ball-bearing drawer glides for smooth, full extension.
- UL approved for warming towels.
- Accessory six-piece container set available.

CUSTOM PANEL

Warming Drawer Front

Wolf stainless steel and integrated drawer fronts allow for many design options, but the warming drawer itself will be the same for all applications.

When installing a Wolf warming drawer in combination with an E series built-in oven, you may choose the stainless steel drawer front to match the trim and handle of your oven. The pro series 51 mm thick drawer front with pro handle is designed to be installed below a sealed burner rangetop, so the panel aligns properly with the front of the rangetop.

Keep in mind, overall dimensions for the warming drawer remain the same, even though the drawer front may be wider to match a Wolf 914 mm wide sealed burner rangetop.

OVERALL DIMENSIONS

Stainless Steel Drawer Front			
E SERIES		A	B
Tubular Handle		29 mm	89 mm
PRO SERIES		A	B
25 mm Thick / Pro Handle		29 mm	89 mm
51 mm Thick / Pro Handle		54 mm	114 mm

Dimensions may vary ± 3 mm.

Integrated Drawer Front			
CUSTOM PANEL	W	H	D
Typical	759 mm	264 mm	19 mm
Minimum	746 mm	254 mm	19 mm
RECESS			
Overlay*			5 mm
Flush Inset	thickness of custom panel + 5 mm		

\*Cabinet face may need to be recessed to conceal warming drawer face frame.

## Planning Information

The warming drawer must be installed with a Wolf stainless steel or integrated drawer front available through your Wolf dealer. For local distributor information, visit the international section of our website, [wolfappliance.com](http://wolfappliance.com). Specific installation instructions are included with the drawer front.

For all installations, the warming drawer must be fully enclosed, top and bottom.

The warming drawer platform must be able to support 91 kg. The platform must be a minimum of 25 mm above the toe kick to allow for the warming drawer trim which overlaps 16 mm on all four sides.

The warming drawer with E series or pro series 25 mm thick front panel can be installed in a standard or flush inset application. For a standard installation, the drawer front sits proud of the cabinet face frame. A flush inset installation requires the drawer front to be recessed to be flush with surrounding cabinetry. Refer to the illustrations on the following pages for minimum cabinet dimensions for your specific installation.

## ELECTRICAL REQUIREMENTS

The warming drawer requires a separate, grounded 220-240 V AC, 50/60 Hz power supply. The service should have a grounded 3-prong receptacle located within reach of the power cord and flush with the back wall. Total amps for warming drawers is 4.

**Induction Cooktops.** Ultrafast. Exceptionally energy efficient. Induction cooking has been popular among European chefs and homeowners for decades. Its secret is magnetism. Electromagnetic elements cause iron and magnetic stainless cookware to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too. Framed induction cooktops have stainless steel trim. Unframed models have no trim and can be mounted flush with the countertop.

#### KEY FEATURES

- Ceran glass-ceramic surface for scratch resistance and easy cleaning.
- True simmer on select elements prevents scorching.
- Melt setting on select elements for gentle heat.
- Induction elements heat cookware, not the glass, for a cooler, safer cooking surface.

**Electric Cooktops.** Behind that sophisticated, minimalist exterior (available either with classic stainless steel trim or in our trimless design) there lurks a high-performance cooking instrument fairly begging to be put through its paces. All the elements feature a true simmer setting that hold sauces and stews below the boiling point. One element includes an even lower one-touch melt setting. The 762 mm and 914 mm electric cooktops are available in unframed and framed models, with the framed models offered in all three stainless steel trims. Unframed models can be mounted flush with the countertop.

#### KEY FEATURES

- Ceran glass-ceramic surface for scratch resistance and easy cleaning.
- True simmer on select elements prevents scorching.
- Melt setting on select elements for gentle heat.
- Dual and triple heating zones to customize heat for pans of all sizes.
- High-frequency pulsation technology for more even heating.
- Bridge-zone element to create a larger cooking area.

### Planning Information

For ease of installation, Wolf recommends using 838 mm wide cabinets with 762 mm cooktops and 991 mm cabinets with 914 mm cooktops.

A minimum height clearance of 159 mm is required from the top of the countertop and any combustible surface directly below the cooktop.

Unframed induction and electric cooktops can be mounted flush with the top of the countertop or as a frameless installation sitting on top of the countertop surface. In either installation the cooktop cut-out dimensions are the same. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cut-out must be provided. Wolf downdraft systems cannot be used with unframed induction and electric cooktops.

**IMPORTANT NOTE:** Flush mount installations are intended for granite, solid surface or stone countertop surfaces only.

## Induction Cooktop Electrical Requirements

**IMPORTANT NOTE:** Be aware of local codes and ordinances when installing your service.

### 381 mm INDUCTION COOKTOPS

914 mm Framed Cooktop

STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Electrical location applies only to installation with built-in oven.

The diagrams illustrate the required clearances for the oven installation:

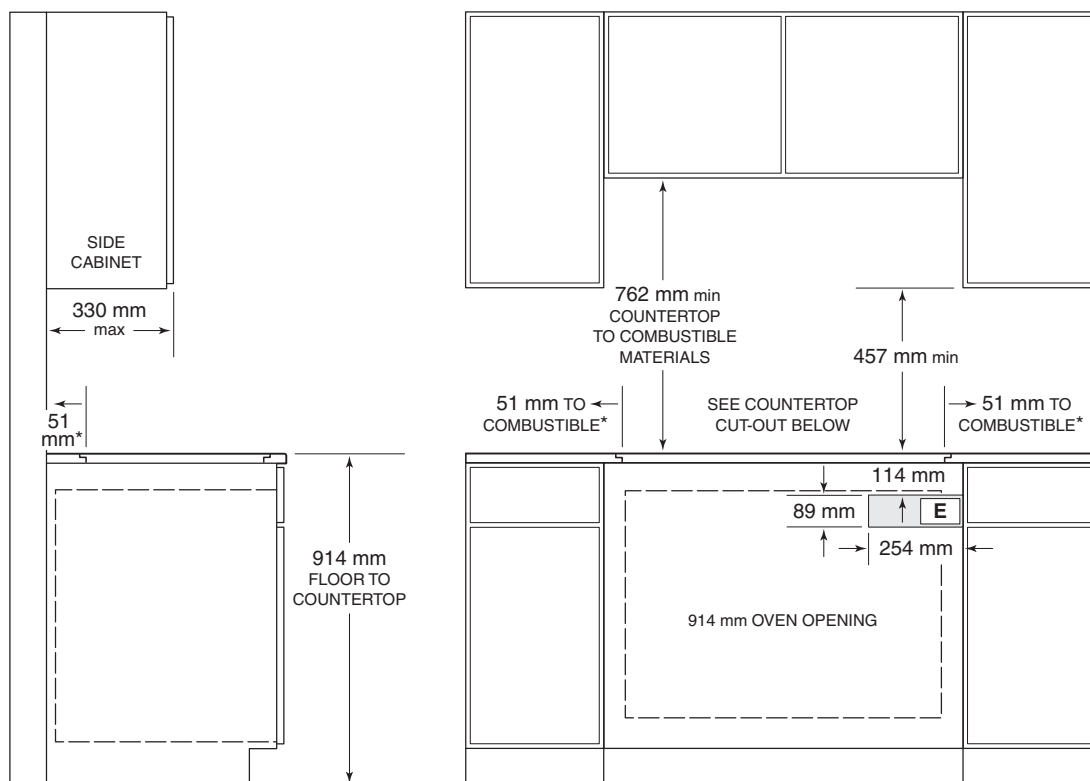

- Side View (Left):** Shows a side cabinet with a maximum width of 330 mm. The oven is positioned 51 mm from the side wall. The distance from the floor to the countertop is 914 mm.
- Front View (Right):** Shows the oven opening (762 mm wide) and the countertop cut-out (762 mm wide). The countertop must be at least 762 mm from combustible materials. The distance from the floor to the countertop is 914 mm. The oven is positioned 51 mm from the side walls. The distance from the floor to the bottom of the oven is 762 mm. The distance from the floor to the top of the oven is 114 mm. The distance from the floor to the bottom of the oven is 762 mm. The distance from the floor to the top of the oven is 114 mm. The distance from the floor to the bottom of the oven is 762 mm. The distance from the floor to the top of the oven is 114 mm.

*NOTE: Electrical location applies only to installation with built-in oven.*

## 914 mm Unframed Cooktop

## FLUSH INSTALLATION

*\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.*

**NOTE:** Electrical location applies only to installation with built-in oven.

**Gas Cooktops.** Just looking at a Wolf gas cooktop can make your heart beat faster. Then, use it just once, and feel the real passion ignite. Dual-stacked, sealed burners place infinite control in your hands—from highest searing heat to the merest breath of flame. This latter precision feature we call true simmer. Pasta sauce or fish stew can simmer for hours without boiling or scorching. Sealed burners make sloshes and spills a snap to clean up. Gas cooktops are offered in classic stainless steel. All models can be ordered as natural or LP gas.

#### KEY FEATURES

- Dual-stacked, sealed burners for precise control and easy cleanup.
- Flame recognition and automatic reignition for safety and ease of use.
- kW from .1 to 4.9 for tasks from melting to searing (3.8 kW on a 381 mm gas cooktop).
- True simmer setting on all burners prevents scorching.
- Illuminated, cool-to-touch knobs for user-friendly comfort.

(2) Small	3.0	.1
<b>914 mm GAS COOKTOP</b>	<b>HIGH</b>	<b>SIMMER</b>
Large	4.9	.2
Medium	3.8	.2
(3) Small	3.0	.1

ELECTRICAL AND GAS REQUIREMENTS

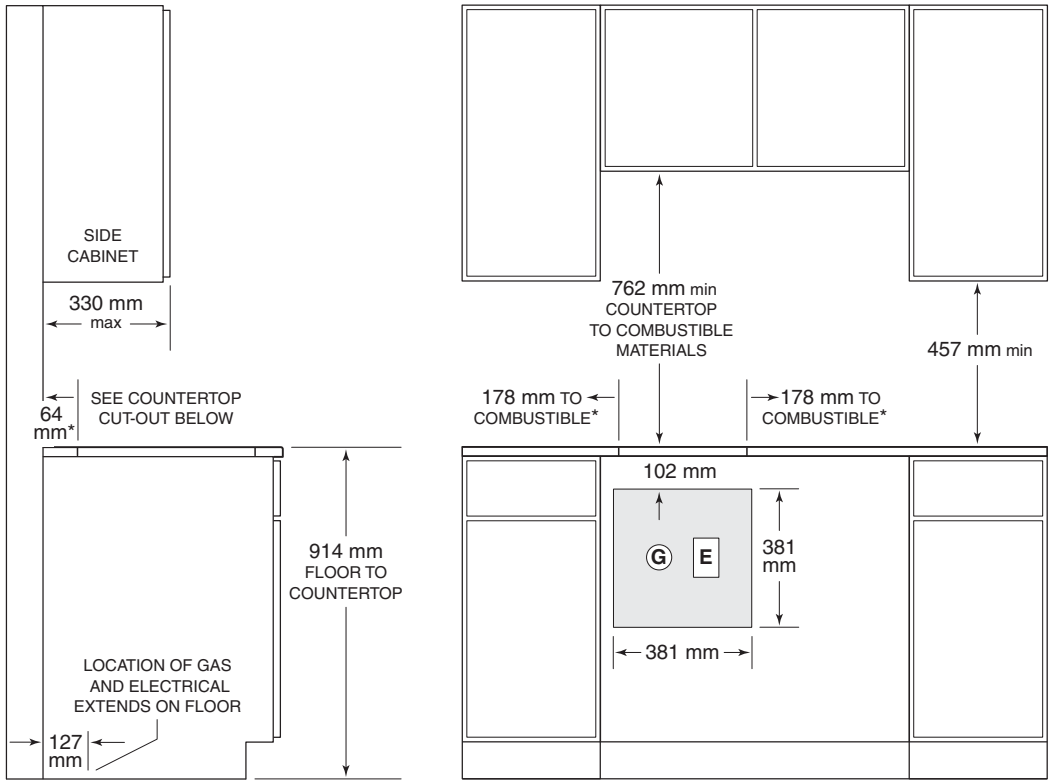

Gas cooktops require a separate, grounded 220-240 V AC, 50/60 Hz power supply. The service should have a grounded 3-prong receptacle located within reach of the 1.8 m power cord. Total amps for gas cooktops is less than one.

A gas supply line of 19 mm rigid pipe must be provided to the cooktop. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the cooktop to the gas supply line.

Wolf gas cooktops are designed to operate on natural gas at 20 mb pressure or LP gas at 37 mb pressure.

381 mm Gas Cooktop

STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Application shown allows for installation of two 381 mm modules side by side.

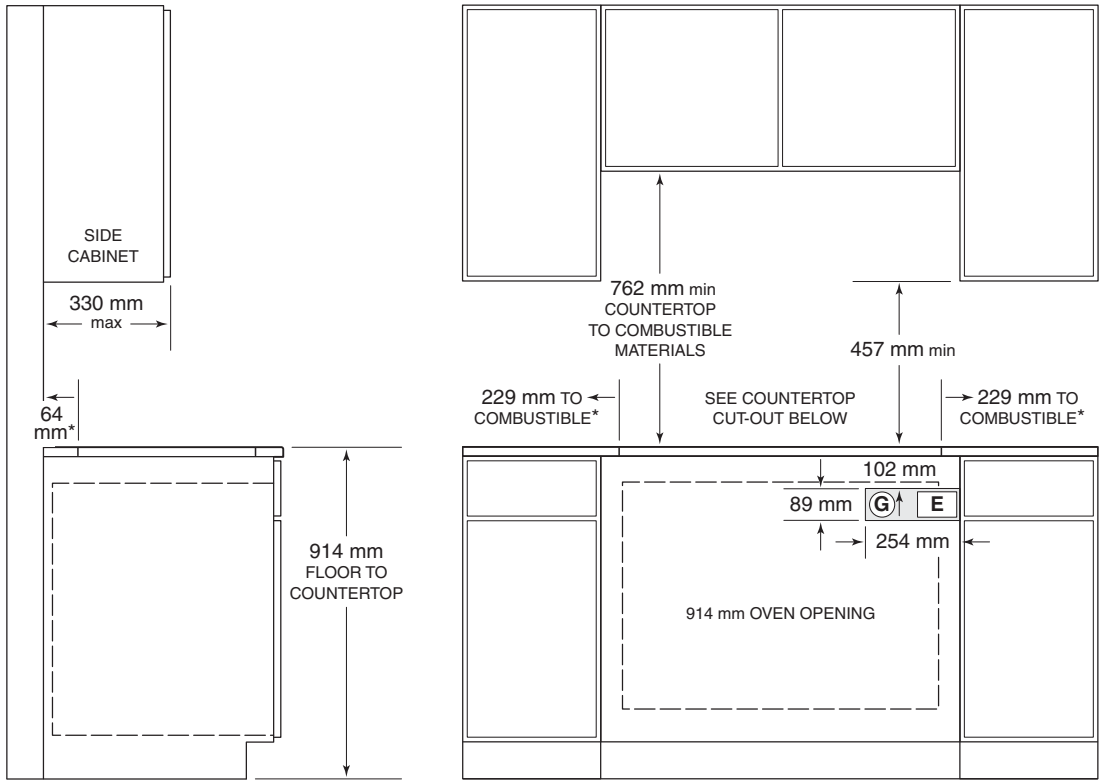

The technical drawings illustrate the installation requirements for the oven. The side view (left) shows a side cabinet with a width of 330 mm max and a depth of 64 mm\*. The front view (right) shows the oven opening with a width of 762 mm and a height of 762 mm min countertop to combustible materials. The countertop cut-out below the oven opening is 102 mm wide and 254 mm high, with a 89 mm gap between the cut-out and the oven opening. The distance from the countertop cut-out to the combustible materials is 457 mm min. The distance from the oven opening to the combustible materials is 229 mm TO COMBUSTIBLE\* on both sides. The distance from the floor to the countertop is 914 mm FLOOR TO COUNTERTOP.

*NOTE: Gas and electrical location applies only to installation with built-in oven.*

914 mm Gas Cooktop

STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Gas and electrical location applies only to installation with built-in oven.

**Integrated Modules.** Passion for cooking reaches new dimensions with our 15-inch integrated modules. Seven models cover the gamut of cooking methods, from searing to deep frying to induction. Combine modules à la carte-style to create a truly custom cooktop. Turn any countertop into a cooking area. Even add specialty functions alongside an existing cooktop or range. Low-profile grates, dual-stacked burners, deep spill pans and illuminated controls allow these modules to integrate perfectly with their larger counterparts and deliver equal performance. Integrated modules are crafted of stainless steel or have stainless steel trim.

#### KEY FEATURES

- Induction cooktop: Iron and other magnetic cookware heat instantly, while the cooktop surface stays cool.
- Electric cooktop: Elements operate with high-frequency pulsation technology for consistent heating.
- Electric grill: Dual elements ensure precise control in front and rear zones for year-round grilling.
- Electric steamer: Powerful heating element steam cooks meats, vegetables and grains beautifully.
- Electric fryer: Fried foods emerge crisp and light, due to precise temperature control.
- Gas cooktop: Equipped with the same dual-stacked burners as our larger cooktops.
- Multi-function cooktop: High-output burner concentrates its flame in precisely the right spot for stir-frying.

Planning Information

When multiple cooktops or modules are installed side by side, the dimensions provided in the chart are derived by adding 32 mm additional space for each additional unit, to give you the total countertop cut-out width. Dimensions include the optional filler strip available through your Wolf dealer. For local distributor information, visit the international section of our website, wolfappliance.com.

Refer to specifications on the following pages for specific installation requirements and limitations for each integrated module. Review specific installation instructions for product-to-product capabilities. Installation specifications for the induction and electric cooktops can be found on page 24 and for the gas cooktop on page 32.

**IMPORTANT NOTE:** Wolf does not recommend the use of downdraft ventilation with the grill, steamer or fryer modules.

Multiple Cooktops	
COUNTERTOP CUT-OUT	WIDTH
2 Modules	743 mm
3 Modules	1130 mm
4 Modules	1518 mm
762 mm Cooktop / Module	1124 mm
762 mm Cooktop / 2 Modules	1511 mm
914 mm Cooktop / Module	1276 mm

ELECTRICAL REQUIREMENTS

Wolf electric modules require a separate, grounded 3-wire 220-240 V AC, 50/60 Hz power supply. Gas modules require a separate, grounded 220-240 V AC, 50/60 Hz power supply and a grounded 3-prong receptacle located within reach of the 1.8 m power cord. Total amps for the electric cooktop is 16. Total amps for the electric grill, steamer and fryer is 12. Total amps for gas and multi-function cooktops is less than one.

When multiple cooktops or modules are installed side by side, each unit must have its own separate electrical supply.

GAS REQUIREMENTS

A gas supply line of 19 mm rigid pipe must be provided to the gas module. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the module to the gas supply line.

When multiple gas cooktops or modules are installed next to one another, they can receive their gas supply from a common line.

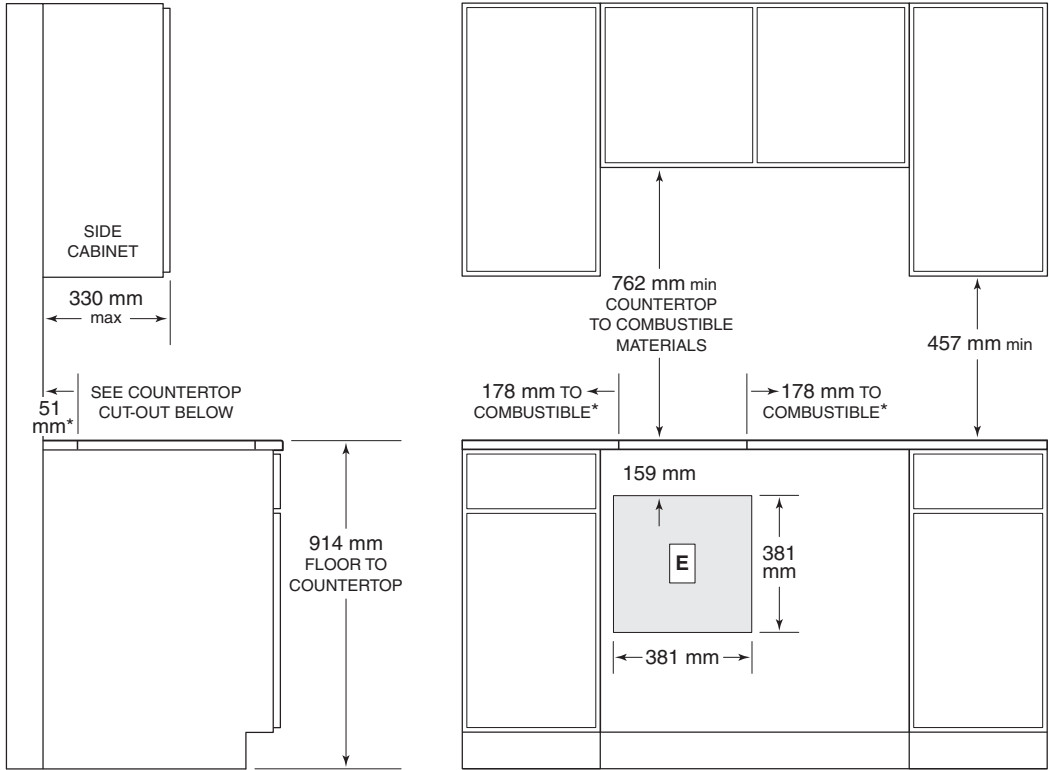

Wolf gas modules are designed to operate on natural gas at 20 mb pressure or LP gas at 37 mb pressure.

Countertop cut-out.

Electric Grill

STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Application shown allows for installation of two 381 mm modules side by side.

## Electric Steamer

## STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Application shown allows for installation of two 381 mm modules side by side.

## DRAIN CONNECTION OPTIONS

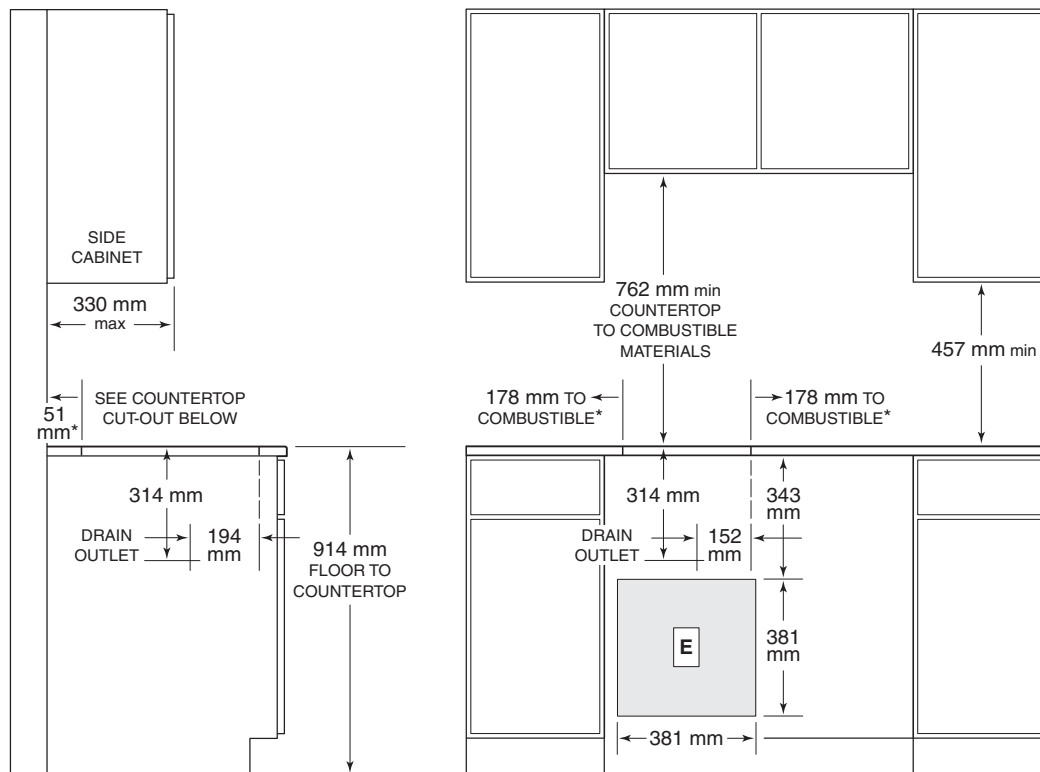

The 16 mm outlet from the steamer valve will accept a drain hose that must flow downward to, and tie into, an existing sink drain. A separate drain with a freefall may also be installed, or a heat-resistant receptacle may be placed under the drain outlet for drainage.

**⚠ WARNING**

The steamer module must be installed at least 381 mm from a Wolf fryer module. Contact between water and hot oil may cause burns from steam and hot oil.

## Electric Fryer

## STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Fryer module must be installed in base cabinet with access to valve at bottom of unit to drain oil into heat-resistant receptacle. Application shown allows for installation of two 381 mm modules side by side.

## DRAIN CONNECTION

The fryer module must be installed in a base cabinet with access to the manual valve at the bottom of the unit to drain oil into a heat-resistant receptacle.

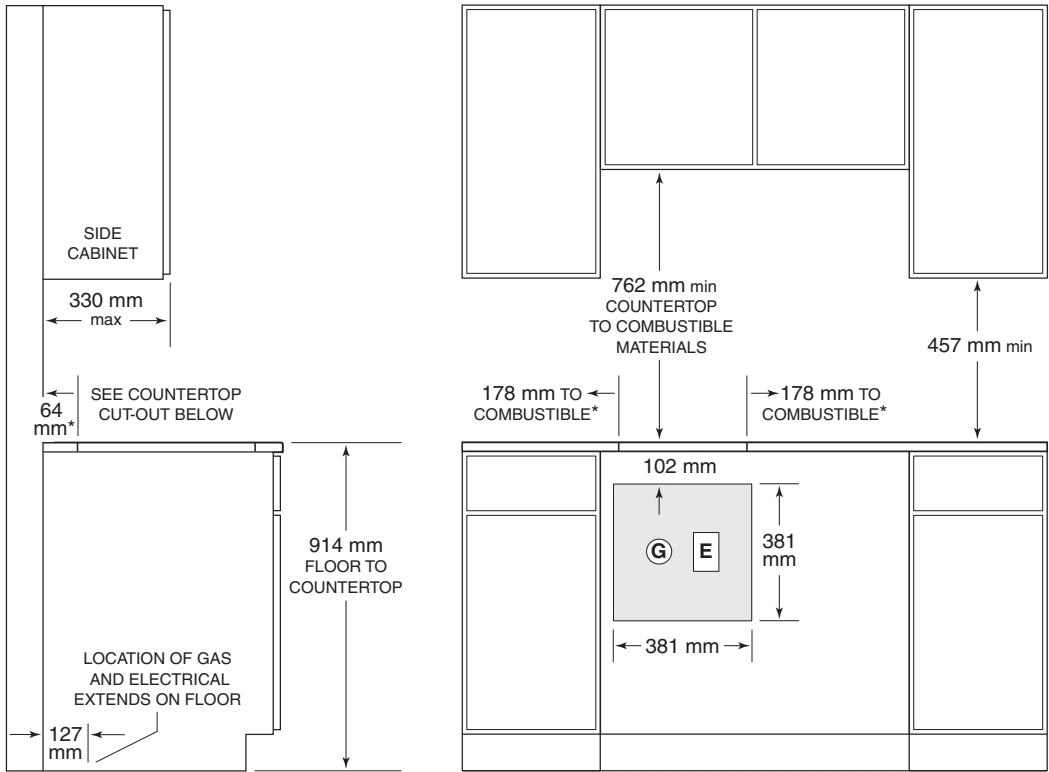

**⚠ WARNING**

The fryer module must be installed at least 381 mm from any open-flame cooking device or a Wolf steamer module. The open flame may cause ignition of oil, and contact between water and hot oil may cause burns.

Multi-Function Cooktop

STANDARD INSTALLATION

\*Minimum clearance from cooktop cut-out to combustible materials up to 457 mm above countertop.

NOTE: Application shown allows for installation of two 381 mm modules side by side.

**Dual Fuel Ranges.** Discover a new world of cooking—the best of two worlds, actually—with a Wolf dual fuel range. Topside, gas cooking in all its glory, with the fine control of dual-stacked, sealed burners and options that include the remarkable French top. Below, that marvel of culinary technology, the Wolf convection electric oven. Its two fans and four heating elements let you select from 10 cooking modes so you can choose the one precisely suited to the dish you’re preparing. Ovens are self-cleaning. With a variety of range widths to choose from, kitchens large and small become gateways to the exciting new world of dual fuel cooking. All models have the classic stainless steel finish and can be ordered in natural or LP gas.

KEY FEATURES

- Dual-stacked, sealed burners for precise control and easy cleanup.
- Patented digital oven control knob.
- Dual convection: two fans for even heat distribution.
- Ten cooking modes, including the bake stone and dehydration kits for precise, easy-to-use control.
- Flame recognition and automatic reignition for safety and ease of use.
- Full-extension bottom rack for easier access to foods.
- Spring and damper door hinge for quiet, effortless opening and closing.

## Planning Information

Available in four widths, Wolf dual fuel ranges are designed to fit a 762 mm, 914 mm, 1219 mm or 1530 mm opening.

**IMPORTANT NOTE:** When installing against a combustible surface, a minimum 254 mm riser is required for a 914 mm dual fuel range with charbroiler or griddle/teppan-yaki and all 1219 mm and 1524 mm models. Follow all minimum clearances to combustible surfaces shown in the installation illustration on the following page.

It is recommended that you use a Wolf pro ventilation hood with the dual fuel range. If the range is to be installed without ventilation, a 914 mm minimum clearance, 1118 mm for charbroiler, from countertop to combustible materials above the range is required. Refer to page 67 for pro ventilation.

Infrared Griddle/Teppan-Yaki	5.6	5.15	
French Top	4.8	4.0	

## ELECTRICAL AND GAS REQUIREMENTS

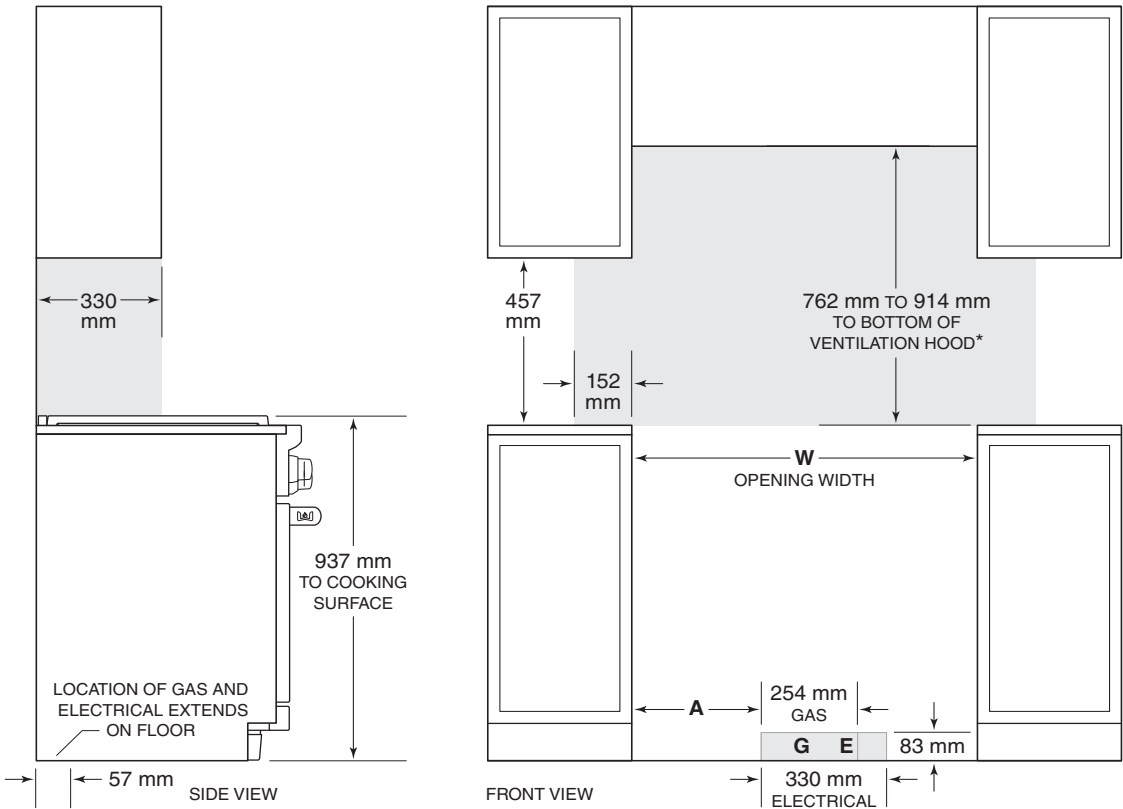

Wolf dual fuel ranges have a terminal block that allows for a 3-wire or 4-wire installation. A separate, grounded 220-240 V AC, 50/60 Hz electrical supply is required with its own circuit breaker.

Maximum Connected Load		
<b>DUAL FUEL RANGE</b>	<b>SINGLE PHASE</b>	<b>3PHASE</b>
762 mm and 914 mm	19 amps	18 amps
1219 mm	35 amps	18 amps
1524 mm	38 amps	18 amps

A gas supply line of 19 mm rigid pipe must be provided to the range. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the range to the gas supply line.

Wolf dual fuel ranges are designed to operate on natural gas at 20 mb pressure or LP gas at 37 mb pressure.

Installation

*\*Without ventilation hood, 914 mm minimum clearance countertop to combustible materials, 118 mm for charbroiler.*  
*NOTE: Shaded area above countertop indicates minimum clearance to combustible surfaces, combustible materials cannot be located within this area.*  
*For island installation, 305 mm minimum clearance back of range to combustible rear wall above countertop.*

Dual Fuel Range		
WIDTH	W	A
762 mm Range	762 mm	216 mm
914 mm Range	914 mm	343 mm
1219 mm Range	1219 mm	610 mm
1524 mm Range	1530 mm	787 mm

**Sealed Burner Rangetops.** Wolf sealed burner rangetops incorporate all the gas cooking features of a Wolf dual fuel range. Customize your rangetop with your preferred combination of burners (from four to six), infrared griddle/teppan-yaki or charbroiler, or the remarkable French top. Compared with conventional electric elements, the infrared elements of the charbroiler and griddle/teppan-yaki are a revelation. They preheat almost instantly, distribute heat more evenly and deliver fast temperature recovery after food is placed on the surface. All sealed burner rangetop models have the classic stainless steel finish and can be ordered in natural or LP gas.

KEY FEATURES

- Dual-stacked, sealed burners for precise control and easy cleanup.
- Optional configurations including: infrared charbroiler, griddle/teppan-yaki and French top.
- Flame recognition and automatic reignition for safety and ease of use.
- Signature red or black control knobs with infinite control.

# Planning Information

Available in three widths, Wolf sealed burner rangetops are designed to fit a 762 mm, 914 mm or 1219 mm opening.

The platform must be able to support 91 kg for a 762 mm rangetop, 113 kg for a 914 mm rangetop and 136 kg for a 1219 mm rangetop. The platform must include a cut-out at the right rear for gas supply and electrical connections.

**IMPORTANT NOTE:** When installing against a combustible surface, a minimum 254 mm riser is required for 914 mm and 1219 mm sealed burner rangetops with a charbroiler or griddle/teppan-yaki. Follow all minimum clearances to combustible surfaces shown in the installation illustrations on the following pages.

It is recommended that you use a Wolf pro ventilation hood with the sealed burner rangetop. If the rangetop is to be installed without ventilation, a 914 mm minimum clearance, 1118 mm for charbroiler, from countertop to combustible materials above the rangetop is required. Refer to page 67 for pro ventilation.

A downdraft can be used with model ICBSRT304. An accessory trim kit is necessary for this installation. Contact your Wolf dealer for details.

# ELECTRICAL AND GAS REQUIREMENTS

Wolf sealed burner rangetops require a 220-240 V AC, 50/60 Hz electrical supply to operate the electronic ignition system. The 1.8 m power cord is equipped with a 3-prong, grounded plug for protection against shock hazard. Total amps for sealed burner rangetops is less than one.

A gas supply line of 19 mm rigid pipe must be provided to the rangetop. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the rangetop to the gas supply line.

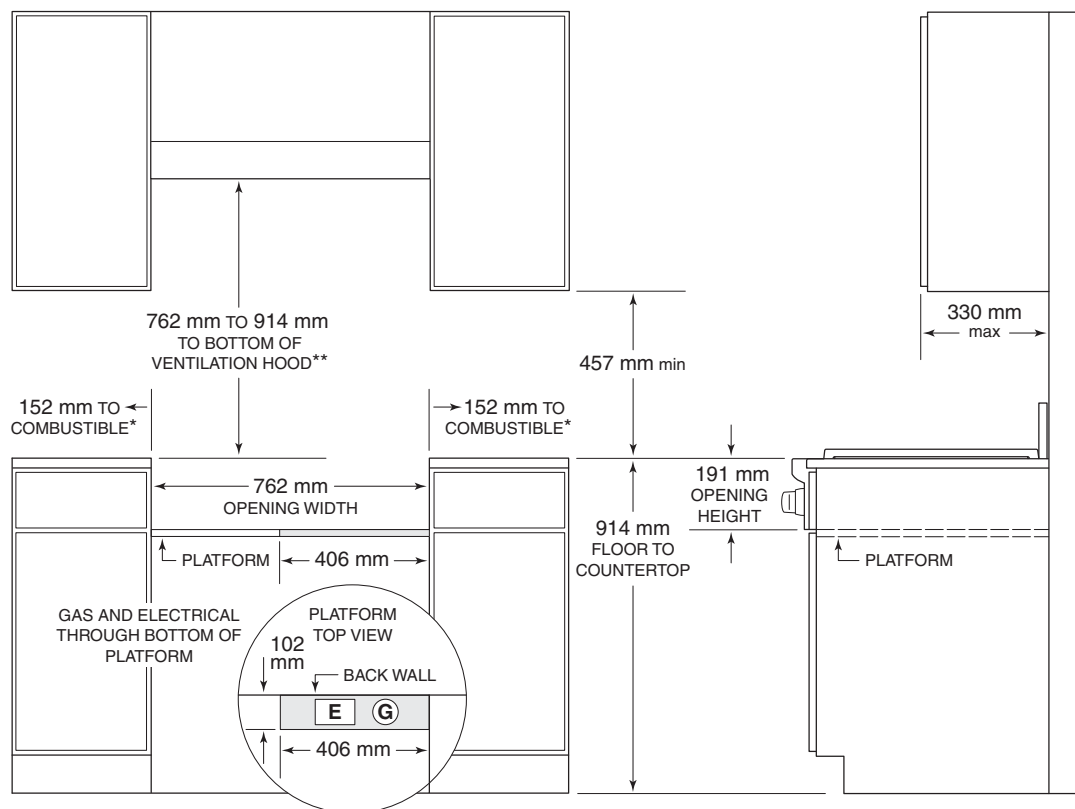

Wolf sealed burner rangetops are designed to operate on natural gas at 20 mb pressure or LP gas at 37 mb pressure.

## 762 mm Sealed Burner Rangetop

### INSTALLATION

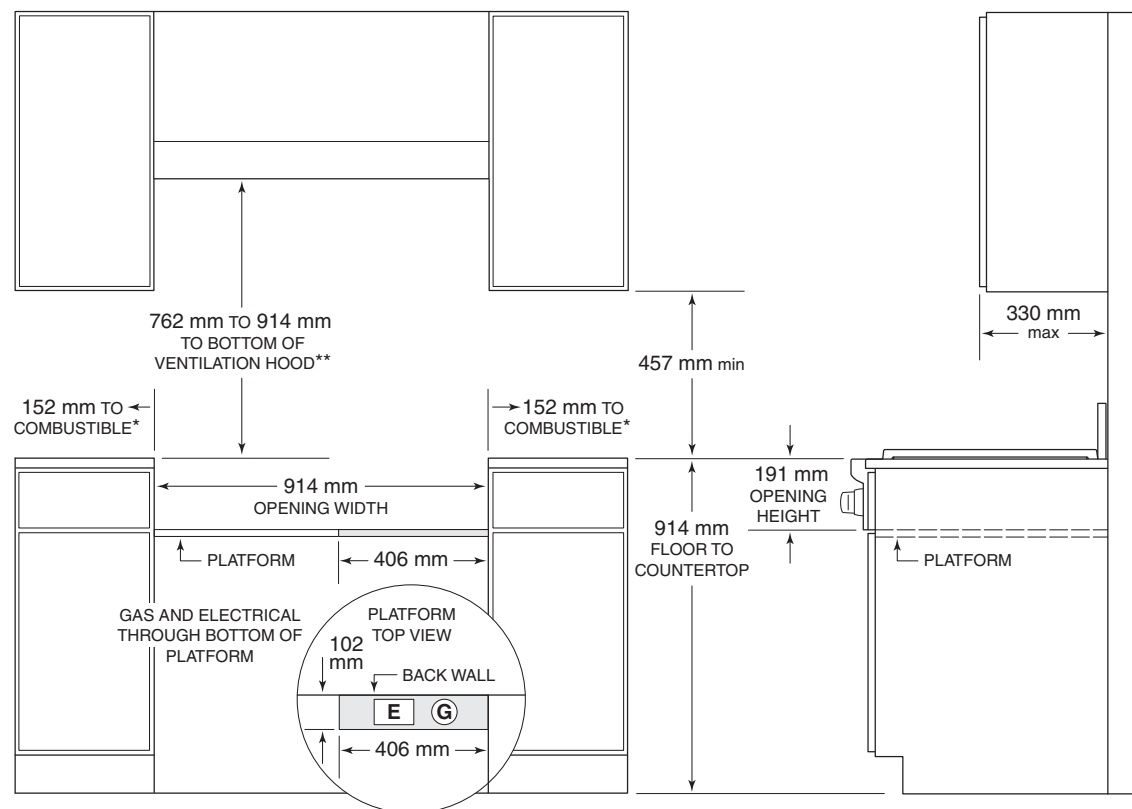

\*Minimum clearance from rough opening to combustible materials up to 457 mm above countertop.

\*\*914 mm minimum clearance from countertop to combustible materials without ventilation hood.

NOTE: For island installations, 305 mm minimum clearance from back of rangetop to combustible rear wall above countertop.

## 914 mm Sealed Burner Rangetop

### INSTALLATION

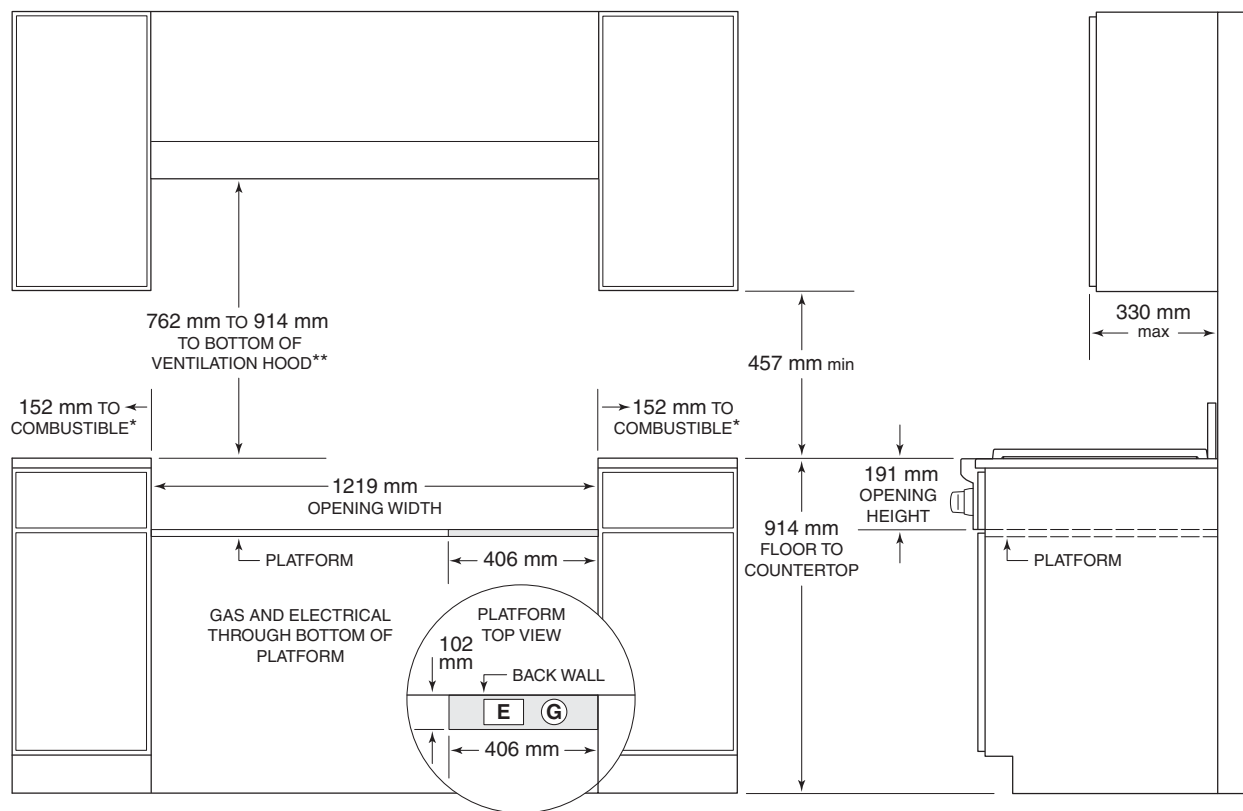

\*Minimum clearance from rough opening to combustible materials up to 457 mm above countertop.

\*\*914 mm minimum clearance, 1118 mm for charbroiler, from countertop to combustible materials without ventilation hood.

NOTE: For island installations, 305 mm minimum clearance from back of rangetop to combustible rear wall above countertop.

## 1219 mm Sealed Burner Rangetop

## INSTALLATION

\*Minimum clearance from rough opening to combustible materials up to 457 mm above countertop.

\*\*914 mm minimum clearance, 1118 mm for charbroiler, from countertop to combustible materials without ventilation hood.

NOTE: For island installations, 305 mm minimum clearance from back of rangetop to combustible rear wall above countertop.

**Gas Ranges.** More than seven decades in the crucible of restaurant kitchens have perfected the form, function and sheer durability of our gas ranges. These precision instruments are as noteworthy for their range of sizes and features as for their exhilarating performance. Standard features include an infrared broiler and convection baking. Dual brass burners go from extremely low flame for simmering to furnace-like 4.4 kW heat for searing. Options include infrared griddle/teppan-yaki and charbroiler. All gas ranges have the classic stainless steel finish and can be ordered in natural or LP gas.

## KEY FEATURES

- Gas convection oven for even heat distribution.
- Dual brass burners delivering .3 to 4.4 kW.
- Infrared broiler with ultrafast preheating.
- Flame recognition and automatic reignition for safety and ease of use.
- Porcelain-coated, cast-iron grates for easy cleaning and durability.
- Signature red or black control knobs with infinite control.

Planning Information

Wolf gas ranges come in 762 mm, 914 mm, 1219 mm and 1524 mm widths.

**IMPORTANT NOTE:** A minimum 127 mm riser is required when installing a gas range against a combustible surface. A minimum 254 mm riser is required when installing a gas range with a charbroiler or griddle/teppan-yaki against a combustible surface. Follow all minimum clearances to combustible surfaces shown in the installation illustrations on the following pages.

It is recommended that you use a Wolf pro ventilation hood with the gas range. If the range is to be installed without ventilation, a 914 mm minimum clearance, 1118 mm for charbroiler, from countertop to combustible materials above the range is required. Refer to page 67 for pro ventilation.

ELECTRICAL AND GAS REQUIREMENTS

Wolf gas ranges require a 220-240 V AC, 50/60 Hz electrical supply to operate the electronic ignition system. The 1.8 m power cord is equipped with a 3-prong, grounded plug for protection against shock hazard. Total amps for gas ranges is less than one.

A gas supply line of 19 mm rigid pipe must be provided to the range. If local codes permit, a certified, .9 m long, 13 mm or 19 mm ID flexible metal appliance connector is recommended to connect the range to the gas supply line.

Wolf gas ranges are designed with a regulator that decreases the line pressure on natural gas at 12.5 mb pressure or LP gas at 25 mb pressure. The maximum gas supply pressure to the regulator should never exceed 100 mb.

NOTE: For island installations, 305 mm minimum clearance from back of range to combustible rear wall above countertop.

**Low-Profile Hoods.** Behind the contemporary lines of the new cooktop low-profile hoods, there's a lot of hard-nosed functional thinking. Brilliant halogen lighting illuminates your cooking surface. Powerful multi-speed blowers whisk away smoke and odors. Wall-mount and island hoods are available in the classic stainless steel finish with sleek black glass control panel.

#### KEY FEATURES

- Internal or remote blower options.
- Telescopic flue fits 8' to 9' ceilings.
- Models with an internal blower can be used in a non-ducted application with a recirculating filter.
- Front-mounted controls with digital indicator.
- Heat sentry to automatically turn unit on when excessive heat is sensed.
- Delay-off feature to automatically turn unit off.
- Stainless steel filter cover with dishwasher-safe aluminum mesh filter.

#### LOW-PROFILE HOODS

Low-Profile Hoods

WALL HOODS

ISLAND HOOD

## Planning Information

Wolf cooktop low-profile hoods are recommended for use with Wolf electric and gas cooktops and integrated modules. These hoods have a telescopic flue that allows you to reach a ceiling height of 2.4 m to 2.7 m with a finished look.

Low-profile wall and island hoods are available with an internal blower. Wall hood models ICBCTEWH36 and ICBCTEWH45 will require a remote blower assembly, available through your Wolf dealer. For local distributor information, visit the international section of our website, [wolfappliance.com](http://wolfappliance.com).

The blower will vary in size and is dictated by the cooking unit, the volume of air that needs to be moved and the length of the duct run. Refer to ventilation recommendations on pages 73–74. These hoods have an 203 mm round duct with vertical discharge.

Cooktop low-profile hoods with an internal blower can be used in a non-ducted application with a recirculating filter. In this installation, kitchen air is purified through filters and returned as clean air into the room. A recirculation kit available through your Wolf dealer is required.

Consult a qualified HVAC professional for specific installation and ducting applications.

## ELECTRICAL REQUIREMENTS

Wolf low-profile wall and island hoods require a separate, grounded 220-240 V AC, 50/60 Hz power supply. Total amps for cooktop hoods is less than one.

Low-Profile Wall Hood

INSTALLATION

## Low-Profile Island Hood

## INSTALLATION

**Downdraft Ventilation.** The cooktop downdraft unit rises from the countertop to whisk away odors and smoke into the easy-to-clean, five-layer mesh filter and can be lowered beneath the countertop when not in use. The control module and top cover are available in classic stainless steel for ease in matching your cooktop.

#### KEY FEATURES

- Internal or remote blower options.
- Top cover and controls available in classic stainless steel.
- Remote-mounted controls with LED indicators.
- Delay-off feature to automatically turn unit off.
- Stainless steel filter cover with dishwasher-safe aluminum mesh filter.

#### DOWNDRAFTS

**ICBDD30I / ICBDD30R**

762 mm

**ICBDD36I / ICBDD36R**

914 mm

**ICBDD45I / ICBDD45R**

1143 mm

## Downdrafts

762 mm DOWNDRAFT

914 mm DOWNDRAFT

1143 mm DOWNDRAFT

## Planning Information

Wolf downdraft systems can be used with Wolf electric and gas cooktops, except unframed models. They can also be used with some integrated modules but are not recommended for use with the electric grill, steamer and fryer modules. A downdraft can also be used with sealed burner rangetop model ICBSRT304. An accessory trim kit is necessary for this installation. Contact your Wolf dealer for details.

**IMPORTANT NOTE:** To install a downdraft with a Wolf cooktop, you must allow for a minimum 638 mm flat counter space from front to back. A countertop with a raised lip or backsplash may not allow enough space for proper installation.

Installation of the remote-mounted control module must be within 3 m of the downdraft assembly and a minimum of 102 mm from the outer edge of cooktop element or burner.

Downdraft models ICBDD30I, ICBDD36I and ICBDD45I include an 845 m<sup>3</sup>/hr internal blower. Remote blower assemblies are available for models ICBDD30R, ICBDD36R and ICBDD45R through your Wolf dealer. For local distributor information, visit the international section of our website, [wolfappliance.com](http://wolfappliance.com).

The blower will vary in size and is dictated by the cooking unit, the volume of air that needs to be moved and the length of the duct run. Refer to ventilation recommendations on pages 73–74.

Downdrafts with an internal blower have a 83 mm x 254 mm duct and for remote blower models, a 83 mm x 356 mm duct. All downdrafts have an adjustable discharge.

Consult a qualified HVAC professional for specific installation and ducting applications.

## ELECTRICAL REQUIREMENTS

Wolf downdraft ventilation systems require a separate, grounded 220-240 V AC, 50/60 Hz power supply. A grounded 3-prong receptacle should be located within reach of the .8 m power cord. Certain installations may require that the electrical supply be placed in an adjacent cabinet. Maximum total amps for downdraft systems is 3 amps.

Downdrafts

INSTALLATION WITH COOKTOP

INSTALLATION WITH SEALED BURNER RANGETOP

\*Additional depth may be required if rangetop is to be installed flush with cabinet face.

**Pro Ventilation Hoods.** Professional heritage shines through in Wolf professional-style ventilation. Exteriors are heavy-duty, welded stainless steel, so finely hand-finished that they appear seamless. Pro hoods are available in a variety of widths. Stainless steel baffle filters and halogen lighting extend the professional look and back it up with pro-level performance.

#### KEY FEATURES

- Internal or remote blower options.
- Recessed easy-access controls.
- Infinite-speed ventilator control.
- Heat sentry to automatically turn unit on when excessive heat is sensed.
- Easy-to-clean stainless steel baffle filters.
- Heat lamp receptacles on 686 mm deep models (bulbs not included).

#### PRO HOODS

**610 mm Deep**  
WALL HOOD

**686 mm Deep**  
WALL HOOD

Pro Hoods

610 mm DEEP WALL HOODS

686 mm DEEP WALL HOODS

## Planning Information

Pro ventilation hoods are recommended for use with all Wolf cooking appliances. Wall hoods should be at least as wide as the cooking surface.

**IMPORTANT NOTE:** For optimal performance in wall hood applications, a pro 686 mm deep wall hood is recommended for use with ranges and rangetops that contain a charbroiler or griddle/teppan-yaki.

All pro ventilation hoods are shipped without the blower assembly. Internal and remote blowers are available through your Wolf dealer. The blower will vary in size and is dictated by the cooking unit, the volume of air that needs to be moved and the length of the duct run. Refer to ventilation recommendations on pages 73–74.

Pro hoods have a 254 mm round duct and vertical discharge. A horizontal discharge kit is available through your Wolf dealer.

Consult a qualified HVAC professional for specific installation and ducting applications.

Optional classic stainless steel duct covers in a variety of heights are available for all pro wall hoods through your Wolf dealer. For local distributor information, visit the international section of our website, [wolfappliance.com](http://wolfappliance.com).

## ELECTRICAL REQUIREMENTS

Wolf pro ventilation hoods require a separate, grounded 220-240 V AC, 50/60 Hz power supply. Maximum amps for pro ventilation hoods is 4.8 amps.

## RECIRCULATING INSTALLATION

610 mm and 686 mm deep wall hoods with an internal blower (1014 m<sup>3</sup>/hr or less), 762 mm and 914 mm widths only, can be used in a non-ducted application with a recirculating filter. In this installation, kitchen air is purified through filters and returned as clean air into the room. A recirculation kit available through your Wolf dealer is required.

610 mm Deep Wall Hood

INSTALLATION

## 686 mm Deep Wall Hood

### INSTALLATION

## Blower Assemblies

For Wolf ventilation hoods and downdrafts that do not include a blower assembly, an internal or remote blower assembly must be selected to accommodate the cooking appliance, m<sup>3</sup>/hr requirements and homeowner preferences. Internal and remote blowers are available through your Wolf dealer. For local distributor information, visit the international section of our website, [wolfappliance.com](http://wolfappliance.com).

Ventilation recommendations on the following pages provide m<sup>3</sup>/hr recommendations and blower options for each ventilation hood and downdraft.

Refer to the illustrations below for dimensions of Wolf remote blowers. Installation instructions shipped with each Wolf ventilation product provide detailed specifications. These instructions can also be found on our website, [wolfappliance.com/specs](http://wolfappliance.com/specs).
